

Biodiversity Commitment

Objective

PT Great Giant Pineapple (GGP) is committed to continuously preserving biodiversity around our operational areas as part of our responsibility to mitigate the potential impacts of our operations. This policy acts as company guidelines related to comprehensive biodiversity management at GGP.

Scope

This biodiversity policy applies to all operations within the scope of PT Great Giant Pineapple, hereinafter referred to as the 'Company'.

Definition

Biodiversity is the variation among living organisms from different sources including terrestrial (above land) and under water and the ecological complexes of which they are a part.

Policy Statement

1. The Company is committed to maintaining biodiversity around operational areas and areas adjacent to conservation zones.
2. The Company is committed to maintaining biodiversity conservation, which is realized by carrying out an initiative to map land and water biodiversity related to microfauna, fauna, and flora ecosystems at several active sites in the company's area.
3. The Company is committed to measuring, setting objectives, and establishing reporting and monitoring systems, both internally and through partners, to ensure compliance with the commitments set out in this Policy.
4. The Company holds training and builds awareness regarding biodiversity management for all elements of business units, employees, and suppliers.
5. The Company actively collaborates with stakeholders, including local communities, to preserve the ecosystem through preventive, mitigation, and biodiversity restoration efforts.
6. The Company encourages the application of a risk assessment and mitigation hierarchy (avoid, minimize, remediate, and offset) in extended supply chains where potential impacts on biodiversity are generated. Likewise, it promotes compliance with laws regarding biodiversity, seeks continuous improvement and consolidation of management systems that support the sustainable use of natural resources.

Conservation and Protection Action

1. No Deforestation

The Company prohibits logging activities of natural trees and the destruction of conservation areas around operational areas. Company engages with suppliers to encourage them using green practices approach.

2. Prohibit Hunting

The Company prohibits hunting, provocation, catching, or selling wild animals around the plantation area and operational sites.

3. Bio Pest Management

The Company prohibits use of explosives and toxic materials to destroy pests and to prevent exposure to the adverse effects of these toxic materials on the environment.
