

Environmental Policy

Objective

Apply, maintaining, and developing an environmental management system in the PT Great Giant Pineapple (GGP) operational area to carry out environmentally responsible production, such as absorbing resources, preventing pollution, mitigating climate change and minimizing environmental impacts.

Scope

The environmental policy applicable to GGP's operations includes contractors, suppliers and work partners under the supervision of the company, which is regularly updated and monitored as needed. GGP's business operations include the business and agricultural activities of horticultural crops, the processing industry and preservation of canned fruits and vegetables and canned drinks. In total, this policy applies to:

- Production operations and business facilities
- Products and services
- Distribution and logistics
- Environmental due diligence in every value chain
- Waste management
- Suppliers, service providers and contractors;
- Other business partner

Policy Statement

We, PT Great Giant Pineapple are determined to improve people's lives with quality products that are produced sustainably and innovatively. We are determined to protect the environment, including preventing environmental pollution, sustainable use of resources, mitigating and adapting to climate change, and protecting biodiversity and ecosystems in business operations areas through implementing an environmental management system by:

1. Regulatory Compliance

Comply with regulatory obligations related to environmental aspects by applicable laws and standards relevant to the company.

2. Setting Environmental Goals and Targets

Establish environmental goals and targets based on the evaluation of environmental aspects by considering the characteristics, scale and impact of activities, products, services and ISO 14001 (2015) environmental management system standards.

3. Managing the Direct Impact of Company Operations on the Environment

Responsible for any environmental impacts from business activities and regularly carry out evaluation, management and control activities for water pollution, air pollution and B3 waste pollution, which are then reported to relevant regulators and stakeholders.

4. Creating Environmental Awareness

Develop and optimize human resources through training programs and an effective reward system, as well as create ideal working conditions for all employees. Motivate all employees to produce good work performance, be creative, brave and always strive to achieve challenging targets through good teamwork based on each individual's knowledge and competence. Other than that, the Company actively raise awareness among external stakeholders about the Company environmental management policy and its impacts through targeted training and communication initiatives.

5. Making Sustainability Improvements

Committed to making continuous improvements, including increasing the efficiency of using natural resources (water conservation and energy saving), reducing greenhouse gas emissions, and implementing the principles of reuse, reduce and recycling in the production process.

6. Policy Communication

Carry out communication, consultation and participation with stakeholders, including everyone who works on behalf of the company.

Monitoring and Evaluation

Implementation of environmental policies is coordinated, monitored and evaluated by the Sustainability SubDivision involving all relevant divisions and departments. The performance of environmental policy implementation is reported annually to the Board of Directors, Board of Commissioners, regulators and all stakeholders in the Environmental Performance Report and Sustainability Report.

This environmental policy is evaluated and if necessary, can be revised by developments in environmental aspects and the business context of PT Great Giant Pineapple. This environmental policy is open to the public, and socialization and communication are carried out with stakeholders, including all people who work on behalf of the company.
