

PT Great Giant Pineapple

Statement Letter: PT. Great Giant Pineapple Material Topics 2023-2024

As part of our commitment to transparency and responsible business practices, Great Giant Foods (GGF) recognizes the importance of addressing the most relevant and significant sustainability issues that impact on our operations and stakeholders.

Our material topics are determined through a materiality assessment aligned with the GRI Standards 2021. In 2022, we conducted Focus Group Discussions (FGDs) involving 36 participants from relevant business units and other GGF entities on October 14, 2022. Additionally, we distributed questionnaires to 66 respondents from both internal and external stakeholders to identify the Environmental, Social, and Governance (ESG) topics critical to GGF's sustainability.

In 2024, PT. Great Giant Pineapple, as one of GGF's business units, undertook a reassessment of GGF's materiality topics previously identified. This reassessment aimed to ensure the continued relevance of these topics in alignment with the evolving operational and external landscape. The updated materiality assessment involved distributing questionnaires to 236 respondents, comprising both internal and external stakeholders.

After a comprehensive internal review and consultation process with all relevant stakeholders, we are proud to present nine (9) material topics identified as priorities for PT. Great Giant Pineapple sustainability strategy. These topics were reviewed and endorsed by the Board of Directors on February 20th 2025.

Table GGP Material Topics 2023-2024

Identified Material Topics		Explanation of Topics	Data Coverage
1	Products Quality and Customers Satisfaction	Provision of safe and quality products to satisfy customer	Food safety management, Quality Management system, customer satisfaction survey, products relate data, environmentally friendly packaging
2	Sustainable Supply Chain	Ensuring a traceable, inclusive and sustainable supply chain.	Suppliers' data, suppliers audit, farmers related data, traceability data
3	Stakeholder Engagement & Community Empowerment	Engagement with stakeholders and community; creating shared value	Community development programs, CSV programs, etc.
4	Circular Economy	GGF commitments and efforts for Circular Economy	Circular economy initiatives
5	Economic Performance	Good economic performance	Economic indicators such as P&L, growth, etc.
6	Good Employment Practices	Good employment practices including health and safety management practice	Employee headcount, employee benefit, employee relation, training hours, work accident data, etc.

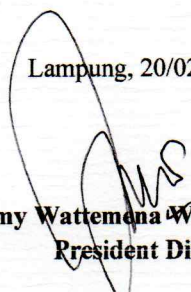

PT Great Giant Pineapple

7	Climate Change including GHG Emission and Energy Efficiency	GGF commitments and efforts to reduce emission and mitigate the impacts of climate change.	GHG emission, energy consumption, climate change related initiatives
8	Sustainable Resource Use	The use of resource sustainably in an effective and productive manner	Pesticide use, soil health, land use, water consumption, antibiotic use, animal care & welfare
9	Waste	Waste management, disposal and reduction	Non-hazardous, hazardous and effluent waste

By focusing on these material topics and incorporating them in our strategy & business decisions, we aim to provide stakeholders with a comprehensive understanding of our sustainability performance and the efforts we are making to address the issues that matter most to our business and society.
